

CV – ESTHER WAIRIMU GITOME.

+254792668224 | estherwgitome@gmail.com |

Motivated Software Engineer with 3 years of experience across industries. I bring a creative focus to front-end development, crafting intuitive and responsive user interfaces (UIs). My proficiency in JavaScript, HTML, CSS, and Python allows me to deliver effective and user-centric solutions, boosting engagement and experience. A strong communicator and problem-solver, I have a proven track record of delivering high-quality software on time and within budget. Beyond technical expertise, I'm Passionate about using technology to support humanitarian goals and drive impactful change.

TECHNICAL SKILLS

- JavaScript (React.js)
- HTML/CSS/HTML5/CSS/Bootstrap/PHP/PySpark/Excel Data Analysis
- Mastery of MySQL/NoSQL/ITSM/SAP
- Machine Learning/Artificial Intelligence /OCR experience
- Process Modelling using Microsoft Vision
- Python/ VBA/ VB.NET/Selenium /SOAP/REST APIs
- Process Documentation/Visualization/ Report writing
- Gitlab IT Best Practices
- Analytical/Excellent Problem Solving/Strategic Planning Skills.
- Network Support and Maintenance

INTERN-INFRASTRUCTURE SUPPORT DEPARTMENT.

Jomo Kenyatta University of Agriculture and Technology | June 2025 to September 2025.

Provided comprehensive technical support to faculty, staff, and students, ensuring smooth operation of the university's IT infrastructure. Troubleshooted network connectivity issues, effectively communicating solutions to resolve problems efficiently.

Key Responsibilities:

- Supported and maintained network infrastructure, including routers, switches, and firewalls, to ensure consistent and secure connectivity across campus.
- Collaborated with cross-functional teams to design and implement network solutions that meet the university's academic and administrative needs.

- Managed hardware-related tasks such as terminating Ethernet cables, installing fiber optic cables, and configuring servers to ensure optimal network performance.
- Monitored network performance and proactively identified and resolved issues to maintain optimal network efficiency and reliability.
- Assisted in network planning and expansion projects, ensuring scalability and adaptability to evolving university needs.
- Provided technical support to faculty, staff, and students, resolving network-related issues promptly and efficiently.
- Utilized network monitoring tools to track network traffic and identify potential security threats.
- Collaborated effectively with team members to ensure the smooth operation and maintenance of the university's network.

Notable Achievements:

- Optimized network infrastructure, resulting in improved connectivity and a 20% increase in network efficiency across campus.
- Successfully completed hardware-related tasks, including terminating Ethernet cables, installing fiber optic cables, and configuring servers, leading to enhanced network stability and performance.
- Proactively resolved network issues, significantly reducing downtime and maintaining seamless network operations.
- Played a key role in network planning and expansion projects, contributing to the university's capacity for future growth and adaptability to changing needs.
- Provided efficient technical support, resulting in a notable decrease in response times for network-related issues.
- Fostered effective collaboration with team members, leading to the successful maintenance and smooth operation of the university's network.

FULLSTACK DEVELOPER/TUTOR (VOLUNTEER).

Techducate Africa (<https://techducateafrica.co.ke/>) | September 2024 – November 2024.

Embarking on my journey as a software development student, my passion for coding wasn't confined to personal projects; it extended to a broader vision of making technology accessible to everyone. Joining Techducate, an innovative group of developers with a shared enthusiasm for empowering underserved communities with essential software skills, was a natural fit for my aspirations.

In my role as a dedicated software tutor at Techducate, I became a catalyst for change, channeling my zeal for software into meaningful impact. Here's a glimpse of the roles and achievements that underscore my commitment to this transformative cause:

Key Contributions:

- Collaborated with students to ensure an interactive and engaging learning environment, fostering teamwork and peer-to-peer knowledge exchange.
- Identified each student's unique capabilities, working closely to understand their strengths and challenges, and tailored learning methodologies to suit their individual learning styles. - Offered mentorship to guide students through their software development journey, providing insights, advice, and support to help them navigate challenges and reach their full potential. - Conducted thorough assessments to gauge each student's proficiency, ensuring that the learning path was personalized to address their specific needs and promote continuous improvement.
- Encouraged open communication and feedback loops, creating an environment where students felt comfortable sharing their thoughts and insights for continuous improvement in the learning process.

Notable Achievements:

- Transformative Impact: Witnessed a significant shift in students' perception of technology, with many expressing increased interest and confidence in pursuing software development as a career.
- Individual Success Stories: Celebrated individual successes, with students demonstrating tangible growth in their understanding and application of software development concepts. - Project Showcase: Presented a showcase of projects developed by students, highlighting the practical skills acquired through project-based learning and demonstrating the real-world applications of software development.
- Community Recognition: Received positive feedback and recognition from the local community for actively contributing to the enhancement of tech education and fostering a culture of learning and innovation.
- Inclusive Learning Environment: Established a supportive and inclusive learning environment, where students from diverse backgrounds felt empowered to explore their potential in the field of software development.

N/B: My dedication to empowering the next generation with tech skills goes beyond the classroom. It's a commitment to leveling the playing field, ensuring that every enthusiastic mind, regardless of their background, has the opportunity to thrive in the world of software development. Through my journey at Techducate, I've not just imparted skills; I've sown the seeds of possibility and potential in the hearts and minds of those who are the future of our digital landscape.

Education

- Bachelor in Software Engineering, KCA University, September 2020 – April 2026.
- Kenya Certificate of Secondary Education Kabare Girls High School, 2016-2019.
- Kenya Certificate of Primary Education, Nyeri Good Shepherd Primary School – 2004 – 2015.

Certification

Cisco Certified Network Associate (CCNA) Level 1 & 2:

Level 1: Focused on foundational networking concepts, including network basics, LAN and WAN technologies, IP addressing, and routing and switching fundamentals.

Level 2: Built upon Level 1, covering advanced networking topics such as network security, troubleshooting, and more complex routing and switching scenarios. These certifications demonstrate your expertise in designing, implementing, and maintaining network solutions.
