

CV – ESTHER WAIRIMU GITOME.

+254792668224 | estherwgitome@gmail.com | <https://www.linkedin.com/in/esther-gitome-4ba90a317/>

Motivated Software Engineering student with practical experience in software development, IT support, and technology solutions. Experienced in developing web and mobile applications, working with databases, integrating APIs, and troubleshooting technical issues. Skilled in Java, JavaScript, React.js, React Native, Node.js, Express, SQL, PostgreSQL, MariaDB, RESTful APIs, Git/GitHub, Linux, and related development tools. Strong problem-solving and analytical skills, with hands-on experience applying software development concepts through academic, personal, and industry projects. Currently seeking opportunities to further develop my technical skills and contribute to practical software development and technology solutions.

TECHNICAL SKILLS

- Java
- JavaScript / React.js
- HTML5 / CSS3
- MariaDB / MySQL
- SQL
- Jakarta EE
- Node.js / Express
- JDBC
- RESTful APIs / SOAP APIs
- Git / GitHub
- Linux
- Maven
- Apache Tomcat
- Zabbix
- Object-Oriented Programming (OOP)
- Data Structures
- Database Management
- System Monitoring

DEVOPS AND SOFTWARE DEVELOPMENT INTERN

MSpace Solutions Ltd | August 2025 to November 2025.

Working in a software development and IT environment, gaining practical experience in Java development, databases, Linux, application deployment, system monitoring, and technical support.

Key Responsibilities:

- Developed and tested application functionality including login, registration, signup, and password recovery.
- Worked with Java and Object-Oriented Programming concepts in application development.
- Worked with MariaDB, including SQL queries, database users, privileges, and application data.
- Connected Java applications to MariaDB using JDBC and retrieved database records using `ResultSet`.
- Worked with Linux, Apache Tomcat, Maven, and Jakarta EE while configuring and testing Java web applications.
- Zabbix monitoring dashboards for system monitoring and reporting.
- Participated in application testing, troubleshooting, documentation, and technical support activities.
-

Notable Achievements:

- Developed an Enterprise Gateway & NOC Simulator using Java to simulate Bulk SMS, USSD, Shortcode, Email, WhatsApp, and M-Pesa gateway services.
- Applied Object-Oriented Programming and data structures including `ArrayList`, `HashMap`, queues, and arrays in the simulator.
- Gained practical experience connecting Java applications to MariaDB using JDBC and working with database users and privileges.
- Successfully worked with Linux, Tomcat, Maven, and Jakarta EE in a Java web-development environment.
- Built practical experience in system monitoring through the creation and use of Zabbix dashboards.
- Implemented and tested core user-access functionality including login, registration, and password-recovery workflows.

PROJECTS

Rental Management System (RMS) — Full-Stack Web Application - in progress

JavaScript | React | Vite | Tailwind CSS | Axios | Node.js | Express | PostgreSQL | SQL | REST APIs

- Developing a full-stack rental management system for managing properties, rental units, tenants, rental information, announcements, and tenant issues.
- Building the frontend using React, JavaScript, Vite, CSS, and Tailwind CSS.
- Developing backend services and RESTful APIs using Node.js and Express.
- Using Axios to communicate between the React frontend and backend APIs.
- Designing and managing application data using PostgreSQL and SQL.
- Using the `pg` package for Node.js–PostgreSQL database connectivity.
- Using dotenv, CORS, and nodemon as part of the application development environment.
- Planning JWT-based authentication for secure user access.

Delivro — Food Ordering Application

React Native | JavaScript | Expo | Redux | Firebase | Sanity | React Navigation

- Developed a mobile food ordering application for browsing restaurants, viewing menus, selecting food items, managing a basket, and progressing through the ordering process.
- Implemented user registration and login functionality.
- Built restaurant and menu interfaces for displaying restaurant information and available food items.
- Implemented basket functionality for adding and managing selected food items.
- Developed order-status screens covering order preparation and delivery stages.
- Used React Navigation to manage navigation between authentication, restaurant, basket, preparation, and delivery screens.
- Used Redux for application state management.
- Integrated Firebase and Sanity into the application.

Internship projects

Rental Management System (RMS) — Java Web Application in progress

Java | Jakarta EE | PrimeFaces | MariaDB | JDBC | SQL | Maven | Apache Tomcat

- Developed a Java-based implementation of a rental management system for managing properties, units, tenants, rental information, announcements, and issues.
- Built application interfaces using Jakarta EE and PrimeFaces.
- Connected the Java application to MariaDB using JDBC.
- Worked with SQL queries and relational database operations.
- Applied object-oriented programming concepts in application development.
- Used Maven for project and dependency management and Apache Tomcat for application deployment/testing.
- Implemented authentication and role-based access for different users.

Enterprise Gateway & NOC Simulator

Java | Object-Oriented Programming | Data Structures

- Developed a Java-based simulator for enterprise gateway and Network Operations Centre (NOC) services.
- Implemented simulations for Bulk SMS, USSD, Shortcode, Bulk Email, Bulk WhatsApp, and M-Pesa gateway services.
- Implemented service request processing, searching, and sorting functionality.
- Applied data structures including ArrayList, HashMap, queues, and arrays.
- Applied classes, constructors, methods, encapsulation, getters/setters, loops, and exception handling.
- Used try-catch blocks to handle application errors.

EDUCATION

- Bachelor in Software Engineering, KCA University, September 2020 – December 2026.
- Kenya Certificate of Secondary Education Kabare Girls High School, 2016-2019.
- Kenya Certificate of Primary Education, Nyeri Good Shepherd Primary School – 2004 – 2015.

REFEREES

FRANCIS AMENYA

Senior Software Engineer - Techducate Africa
